

Access & Platform Lifts Ltd

The Pluto Compact Home Lift

Pluto – the lift for compact spaces

Inspired in design, comfort and simplicity

The Pluto is the smallest available platform lift and is able to fit into almost any space, providing a cost-effective solution for accessibility needs in the home or office.

A Pluto platform lift combines versatility in form and

function with ease of installation and use. It complements and blends into any environment, with just the right aesthetic touch. It will run year in and year out, without incident. Simply, a lift that takes mobility to new levels and adds value to your building.

Since 1995, the Pluto platform lift has been developed with insight to market innovations in close collaboration with architects, builders, installers, access consultants and partners. To this, we add technical know-how and dedicated professional support, providing a solution to fulfill your requirement.

Whether you are designing, building or renovating, a Pluto platform lift offers a range of possibilities.

“If you are looking for everyday accessibility, adapting your home for young and old alike, or simply want the very best in modern design, a Pluto lift is the ideal choice.”

Providing multi-level access where space is at a premium

Fully customisable to blend into your environment

The ideal solution for private and commercial spaces

Safe and secure

Assured with the highest standards of quality and safety, the Pluto platform lift is provided as an access solution in differing environments throughout the world. It is fully compliant with European Directives 98/37/EC and 2006/42/EC, and has a lifting capacity of two persons, or one person in a wheelchair.

So compact

All that's required to accommodate our smallest Pluto is an available floor area of 910 x 870mm.

For commercial environments

In existing commercial environments where space prevents an alternative solution, a Pluto platform lift can also assist in meeting obligations under the Equality Act (formerly DDA) subject of course, to building control acceptance.

For private homes

A Pluto lift can transform any home where mobility is an issue. Faster, safer and more comfortable than a stair lift, yet very easy to operate, the installation of a Pluto platform lift will mean your home can remain just that for as long as you want.

For a touch of elegance

The Pluto fits beautifully into a home with every modern convenience, and brings with it an elegance stemming from its Scandinavian design.

With so many options to customise the style and the finish of the lift it can blend into any environment.

Pluto platform lifts are suitable for a home or office environment

Technical specifications

Specification

| | | | |
|----------------------------|---|------------|------------|

| | (add 25mm to the width for doors on side A & C) | | |
| Platform size [w x d] | 805 x 580 | 805 x 880 | 805 x 1080 |
| Speed | 0.15 m/s | | |
| Travel | 13 metres | | |
| Motor | 1.1 kW | | |
| Power requirement | 230V, 1 ph, 50 Hz | | |
| Rated load | 250kg | | |
| Controls | Constant pressure button | | |

CAD drawings are available on request. All dimensions are in millimetres.

ENVIRONMENT

Specifying a Pluto Platform Lift demonstrates that you have considered your environment. This is by virtue of the products' economical demand on materials, the small carbon footprint, the designed life of over 20 years and their comparatively low energy demand.

At the end of its useful life, over 95% of the materials used in its construction are recyclable.

BREEAM

BREEAM is the leading and most widely used environmental assessment method for buildings. By using a Pluto Platform Lift rather than a conventional lift, the BREEAM count requirement is reduced by two credits, allowing for the whole project score to be recalculated.

Access & Platform Lifts Ltd offer a large range of DDA Lifts for both home and Public use. From a small step Lift to a multiple stop Platform Lift, Internal and External Installations we aim to have the answer for all of your DDA Access needs.
